## **MEDIA INFORMATION**

### **FOR IMMEDIATE RELEASE**

Ref:

Date: 17<sup>th</sup> January 2012

### **Subject: Avionics Europe launch Preliminary Conference Programme**

Avionics Europe, the region's premier conference and exhibition that discusses the issues and challenges in the future of commercial and defence avionics, has announced the preliminary conference programme for the event from 21<sup>st</sup>-22<sup>nd</sup> March 2012 in Munich, Germany, with the launch of the Pre-Show Guide.

The conference programme covering commercial and defence avionics technologies and challenges, will deliver two conference tracks with 50 international speakers, plus a series of technical work shops. The Pre-Show Guide can be downloaded from [www.avionics-event.com](http://www.avionics-event.com).

Leading industry organisations, the Association of European Airlines, SESAR Joint Undertaking, EUROCAE and the German and Royal Aeronautical Societies will also be hosting a series of special forums, focussing on issues directly within the industry, that impact on the work and business of avionics professionals and the industry at large.

An excellent high profile opening keynote speech on Wednesday 21<sup>st</sup> March will see outstanding presentations from:

- Mario Araujo, Director of Engineering, TAP Portugal
- Michael Steinfurth, Head of CMAC Division, EUROCONTROL
- Eric Stefanello, EADS representative and Prosky CEO (an Airbus company)

The opening keynote will be chaired by John Keller, Conference Director and Editor-in-Chief of Military & Aerospace Electronics, who will provide some thought provoking questions to the proceedings.

With its annual gathering of avionics engineers and professionals, designers and pilots, Avionics Europe provides an ideal opportunity for delegates to learn and understand how future avionics issues, such as SESAR and NextGen, and new technologies in development, will integrate with ATM challenges, as our skies continue to become more crowded.

Avionics Europe will be celebrating its 10<sup>th</sup> anniversary in Munich in March. It is the industry leading conference with its unique delivery of high quality presentations and is the must attend conference for the avionics professional.

A full conference programme and further information can be found at: [www.avionics-event.com](http://www.avionics-event.com).
